integraTE

initiative for market establishment and market penetration of PVT – heat pump heating systems

Dr. Korbinian Kramer
Sebastian Helmling
Fraunhofer Institute for Solar Energy Systems ISE

www.ise.fraunhofer.de
integraTE

- heating systems with PVT-panels
- The predominant system design (>80%) is combinations with heat pumps.
integraTE

main objectives

- From the joint market analysis, barriers to market access are to be identified and joint solution paths are to be pursued (access to funding, normative gaps for technical characterization)

- Technology Screening PVT, by evaluating the measurement data from real plants the status quo of the technical solutions is to be determined.

- The preparation of monitoring data from well-functioning PVT plants provide best practice examples. This information will be spread via professional articles, project website, videos, trade fair appearances and training sessions.

- Stimulating market preparation and sales opportunities via appearances at trade fairs and conferences.
integraTE

your benefit

- access with sector associations BDSW, BDH, BWP
- lively exchange with market players, supplier and customer
- product certification consultation
- cooperation for innovations
- benefit from Fraunhofer ISE market knowledge
- marketing: visualization of your plant in professionell design via Fraunhofer ISE homepage
integraTE

monitoring, visualization
Thank you for your kind attention.
