TOWARDS SMART ZERO CO<sub>2</sub> CITIES ACROSS EUROPE  
VITORIA-GASTEIZ + TARTU + SONDERBORG

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 691883

## + 3 Lighthouse cities:

- + Vitoria-Gasteiz, Spain
- + Tartu, Estonia
- + Sønderborg, Denmark

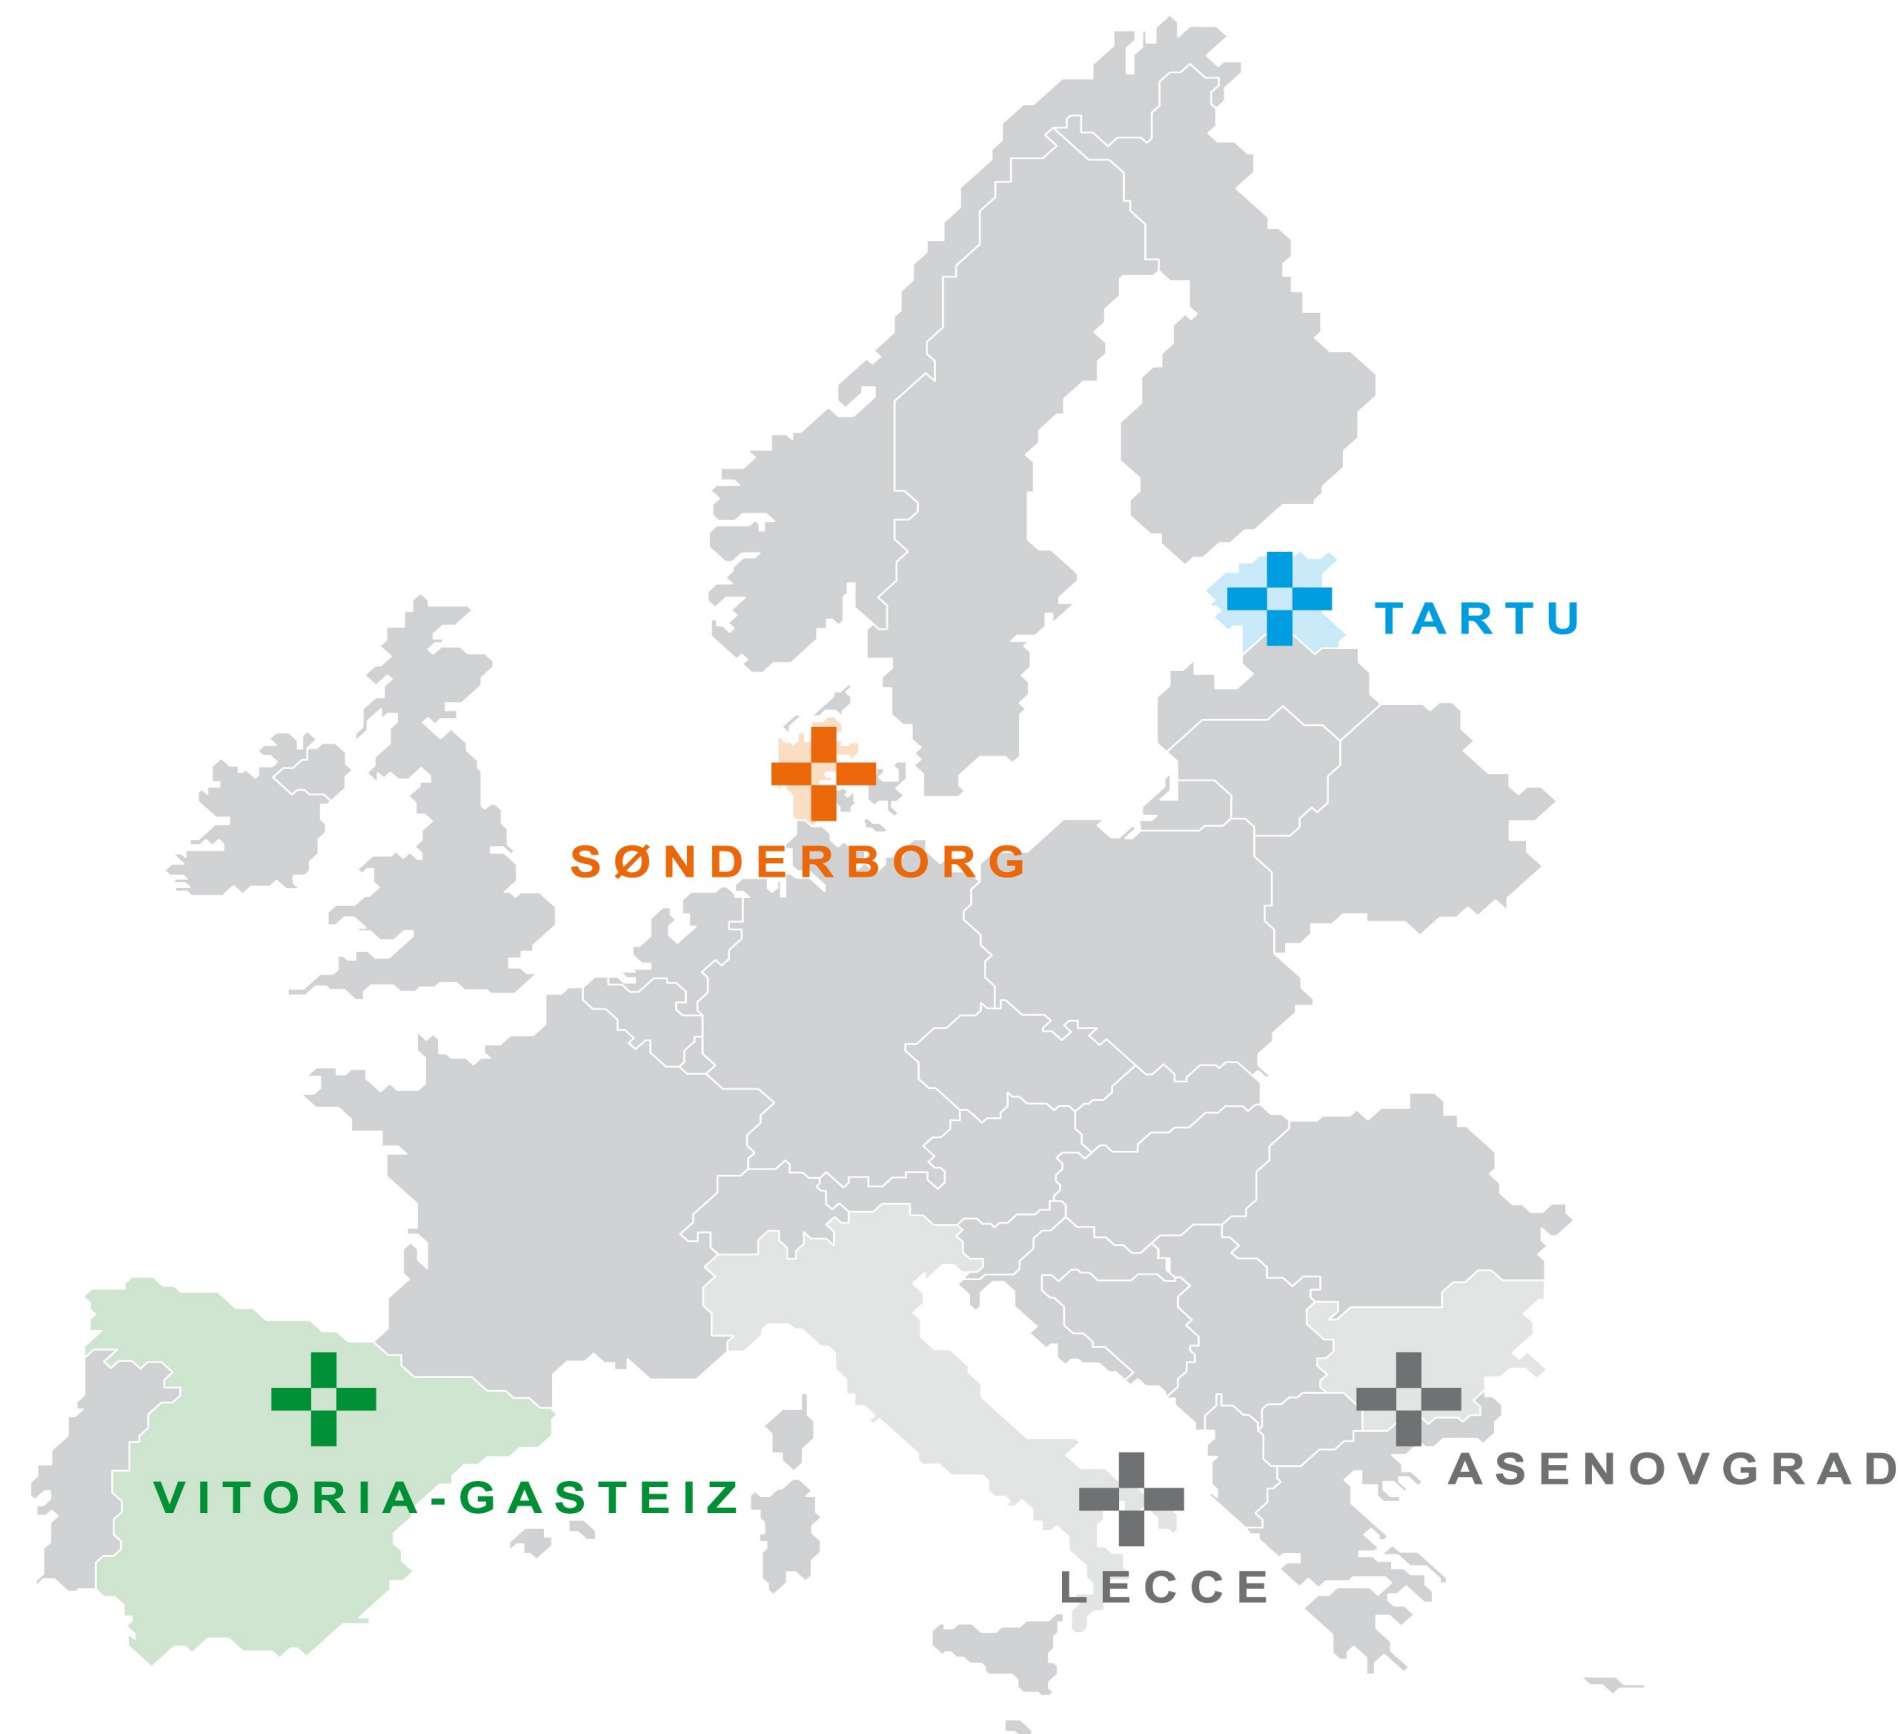

## + 2 Follower cities:

- + Asenovgrad, Bulgaria
- + Lecce, Italy

## + 37 project partners

## + 5.5 years (02/2016-07/2021)

## + 28M€ EU funding

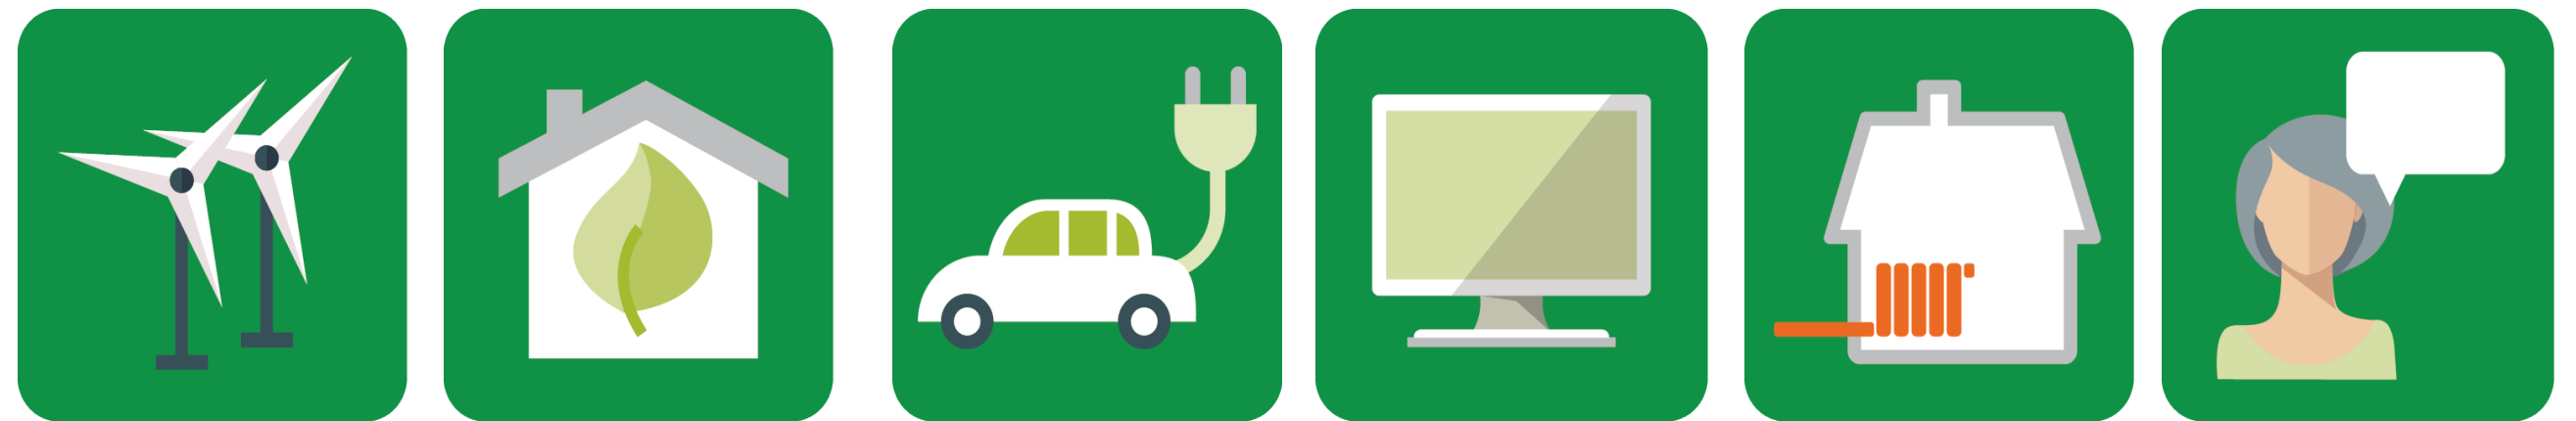

## + Main objective:

*To transform cities across Europe into sustainable, smart, resource-efficient environments*

## + Focus areas:

- + Smart buildings
- + Smart mobility
- + Information and communication technologies
- + Integration of renewable energy (smart electricity, district heating and cooling, etc.)
- + Stakeholder engagement
- + Governance and planning

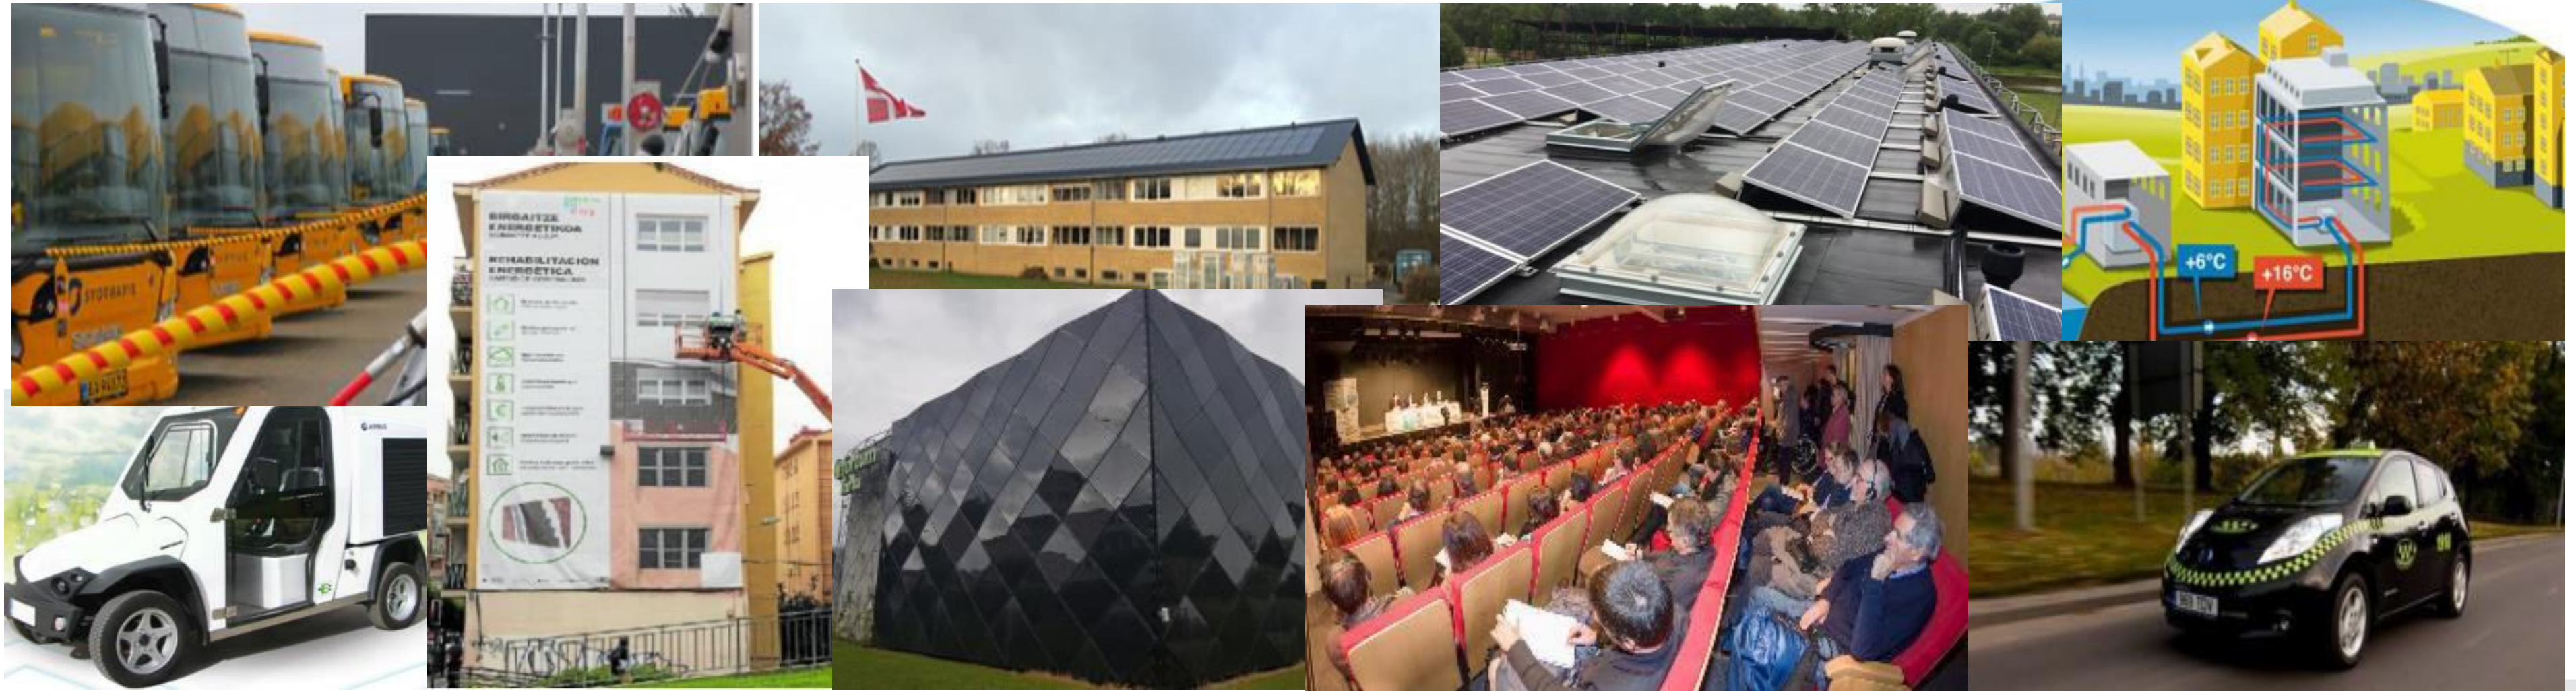

# *Smart Zero Carbon City*

# Smart Zero Carbon City Concept

- ✦ City carbon footprint and energy demand are kept to a minimum by using demand controlled technologies that save energy and promote awareness.
- ✦ Energy supply is entirely renewable and clean.
- ✦ Local energy resources are intelligently managed by aware citizens, as well as coordinated public and private stakeholders.

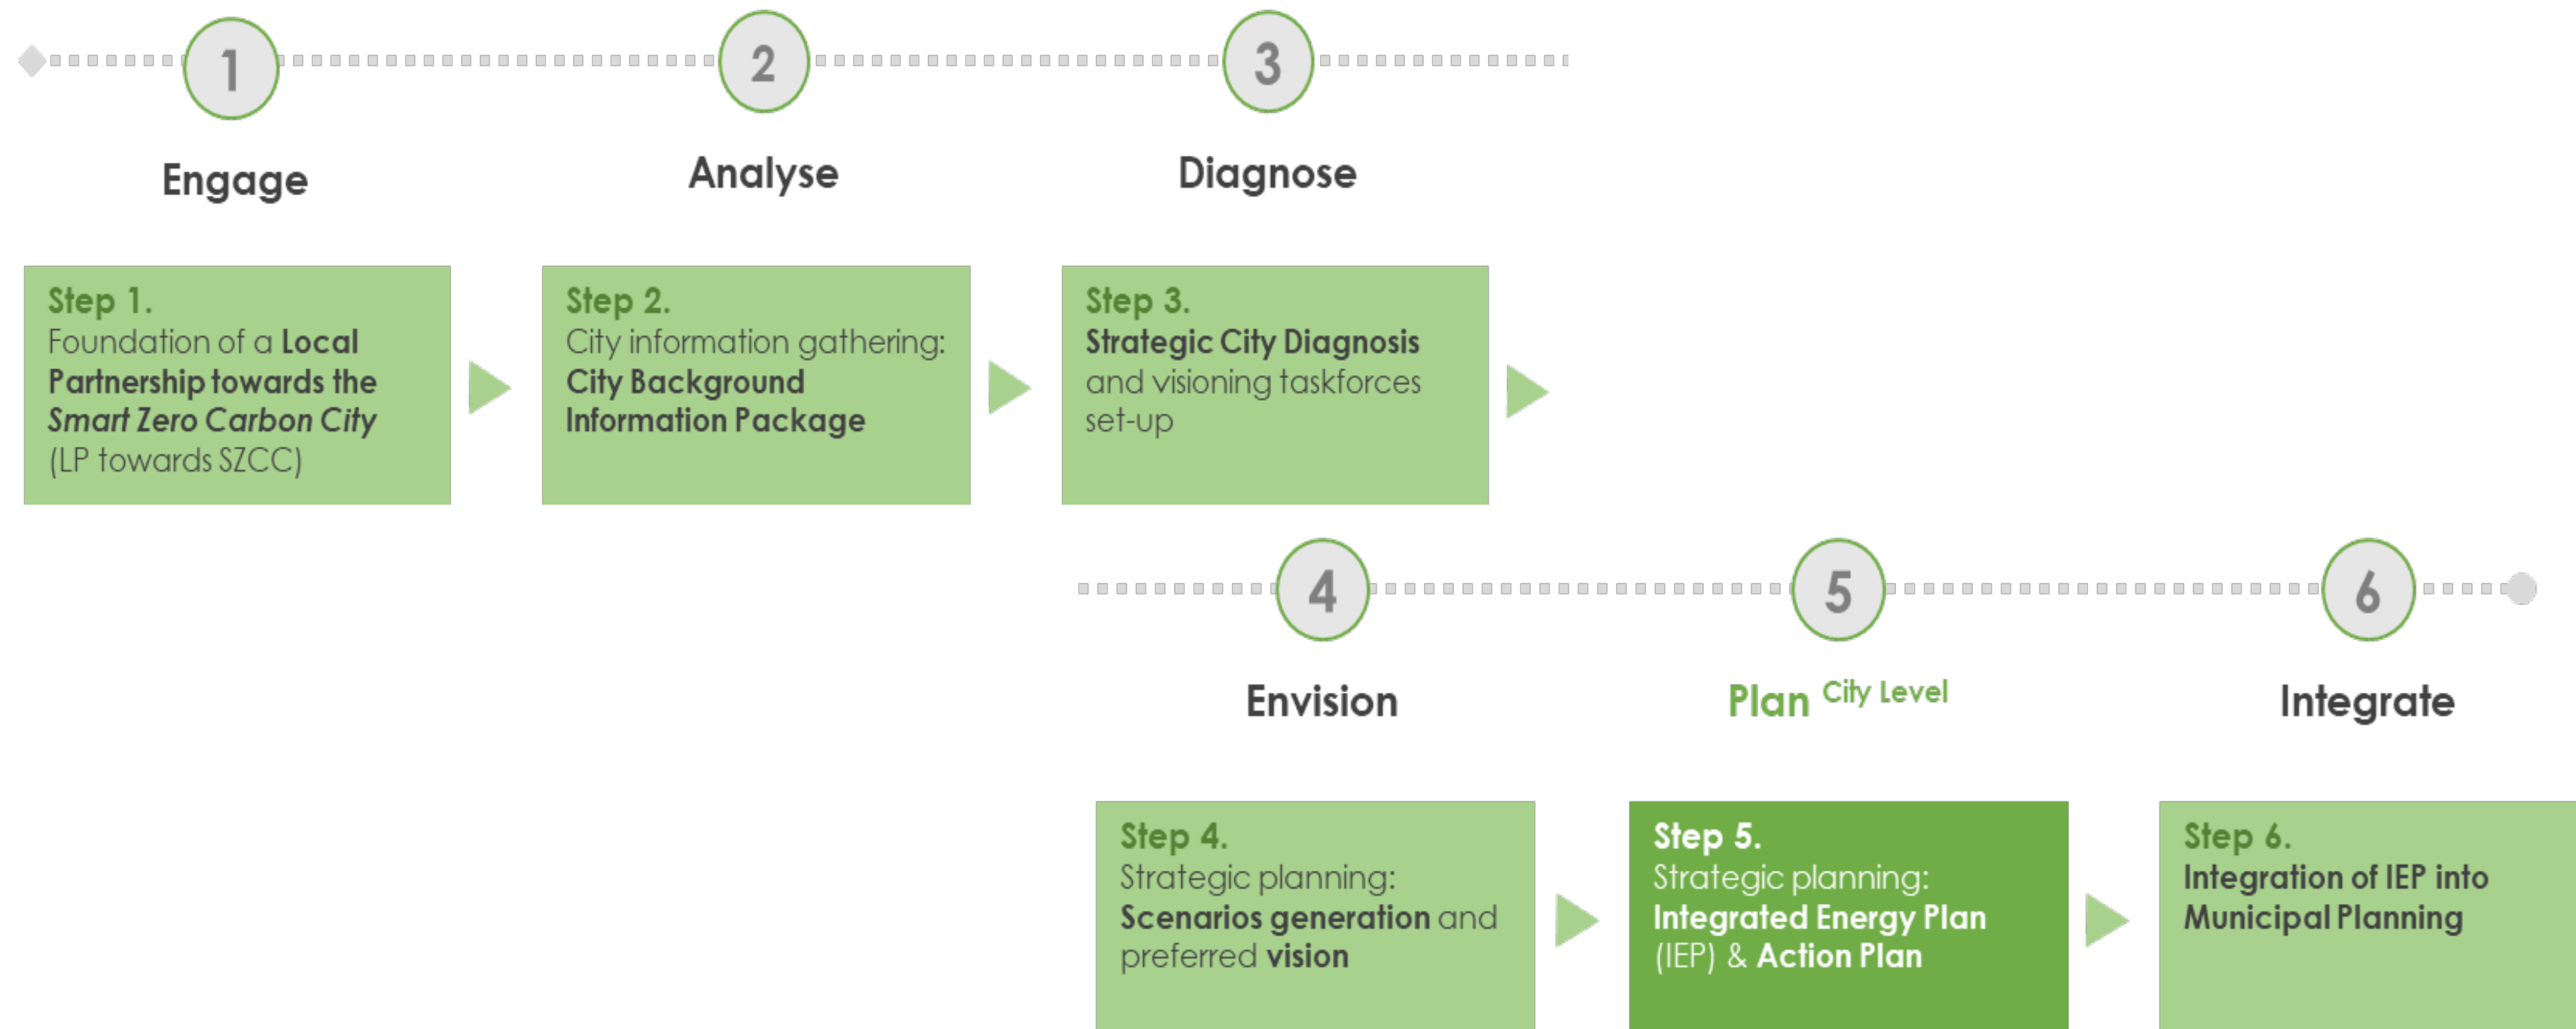

**We enable cities across Europe to become Smart Zero Carbon City frontrunners by:**

- ✦ **JOINING** our effort to co-create Smart Zero Carbon Cities.
- ✦ **SHARING** our ambitions, results and best practice learnings.
- ✦ **OFFERING** the network honest proven experiences, inspirational cases, integrated approach insights, knowledge sharing, tools and learnings from the three SmartEnCity Lighthouse projects, our two Followers and the SmartEnCity Network cities

## + Integrated Energy Plan - the core of Urban transition

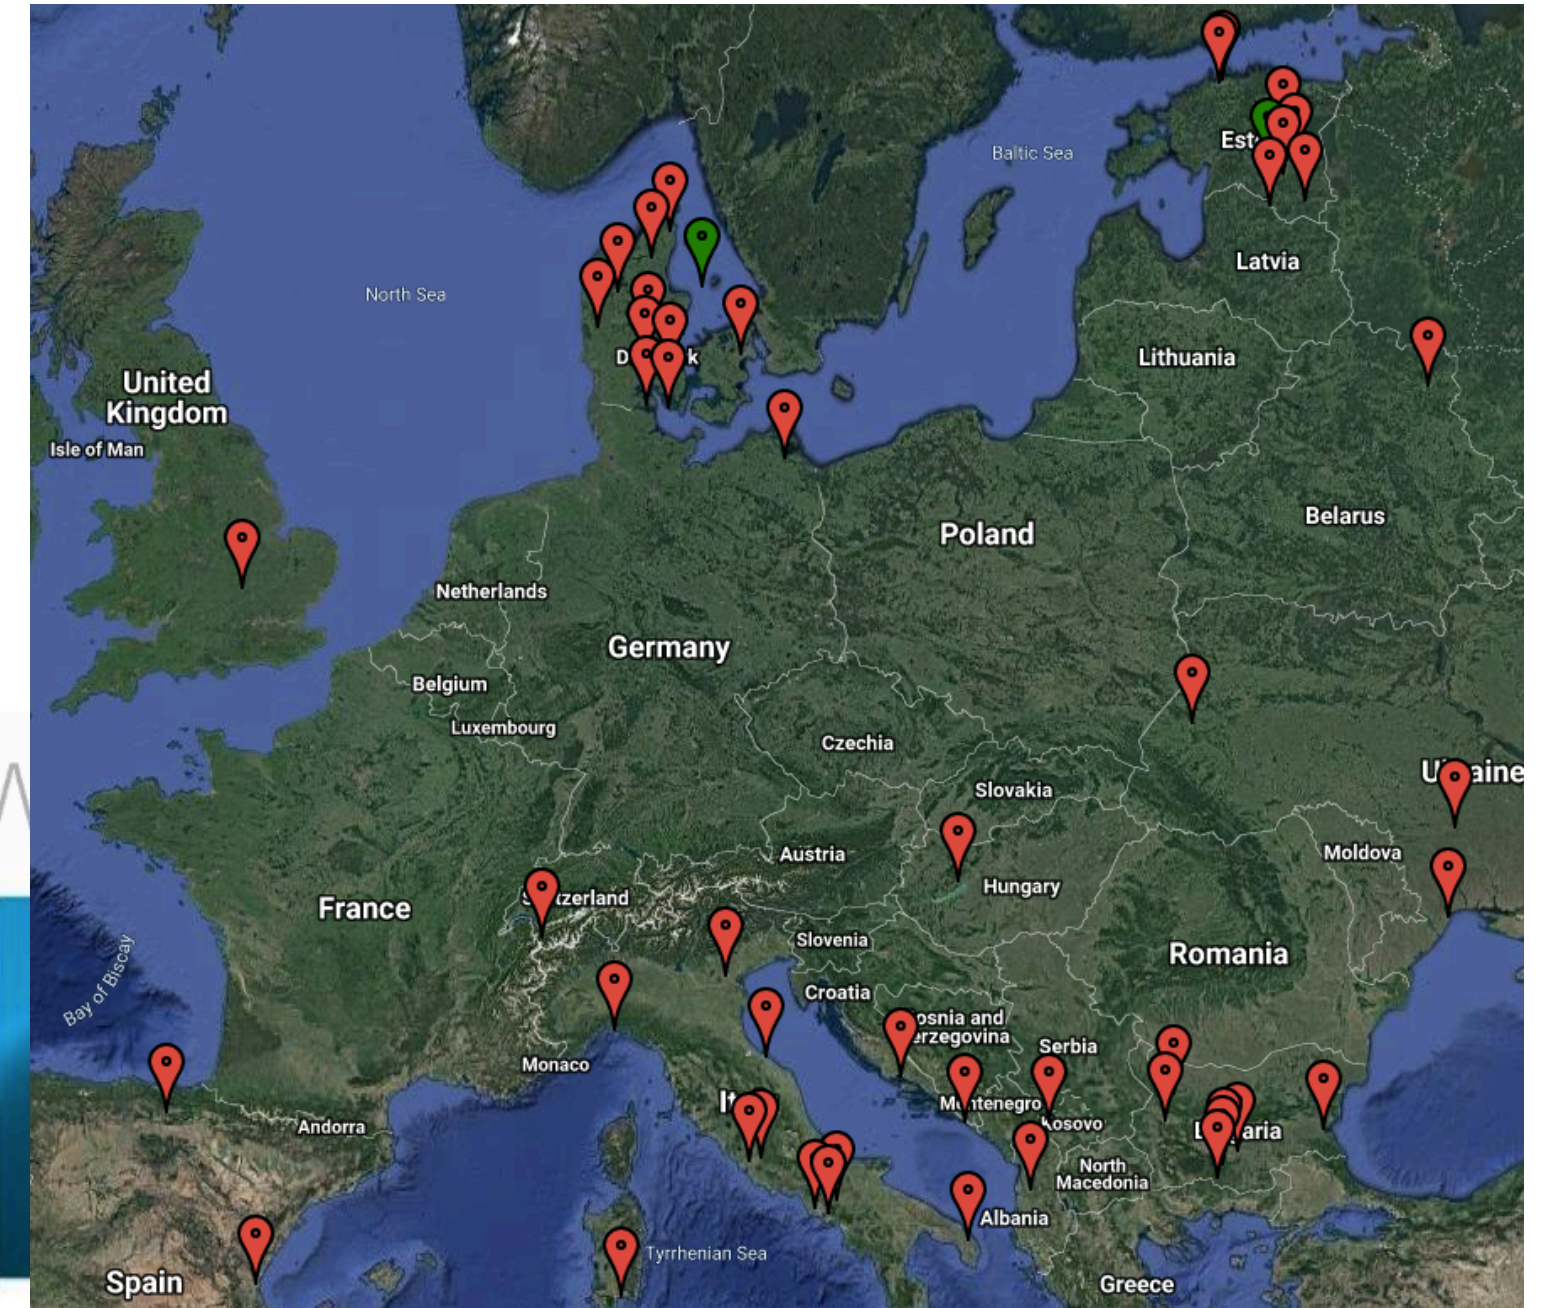

- ✦ 49 city members
- ✦ 14 countries
- ✦ 2 national SmartEnCity Networks
  - ✦ Estonia
  - ✦ Denmark
- ✦ SmartEnCity Network Platform
  - ✦ Smart city solutions
  - ✦ Events
  - ✦ News

SmartEnCity Network Bulletin  
Edition №14

**Dear Readers,**

In this edition of the Network Bulletin we explore the Integrated Energy Planning (IEP) processes of the SmartEnCity Follower Cities – Lecce (Italy) and Asenovgrad (Bulgaria). Lecce provides insight in their Foresight Workshop and Asenovgrad highlights their Integrated Energy Planning process and stakeholder engagement workshop.

David Drysdale, PhD fellow at Aalborg University, Denmark published a new article on the Integrated Energy Planning methodology that has been developed in the SmartEnCity project and has been tested by the Lighthouse and Follower cities. This methodology can be used and adapted to any city that strives toward CO<sub>2</sub> neutrality.

## + Denmark

### + Sønderborg Forerunner

### + Energibyerne – The Energy cities National collaborative group Towards smart zero environments

## + Estonia - The Smart City Club

### + Tartu Forerunner

- + Cooperation and exchange of experiences between ambitious Estonian municipalities
- + Energy savings and smart city principles
- + Smart city concept, data platforms, buildings

## + Goal

- + CO<sub>2</sub> Neutrality by 2029

## + Achievements:

- + Overachieved our 2015 milestone (25%)
- + 35% CO<sub>2</sub> reduction during 2007 – 2016

## + Targeting

- + 50% reduction by 2020
- + 75% reduction by 2025

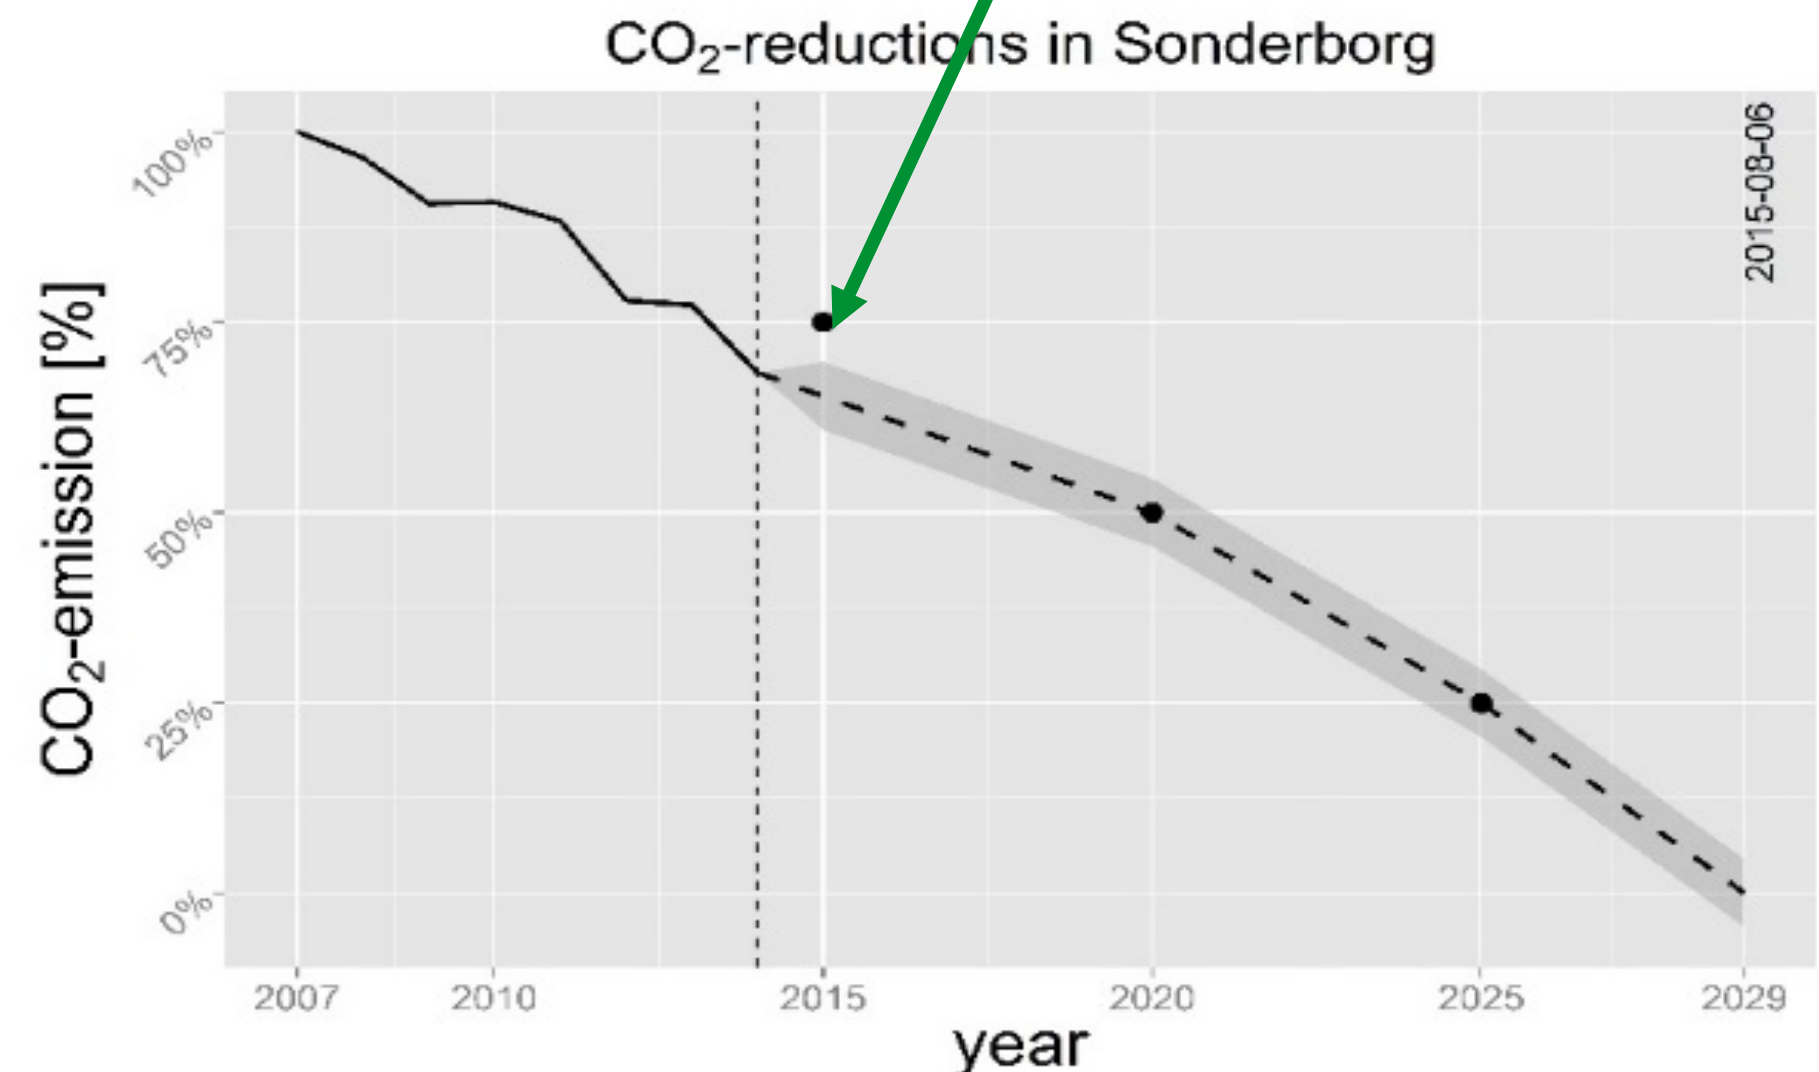

## + 800+ Green Jobs Created

- + In the construction industry
- + Green district heating
- + Energy consulting

722,000 tonnes  
of emissions  
(baseline 2007)

- 35% CO<sub>2</sub>  
by 2016

## The IEP process development of the Roadmap2025 was carried out with the following 8 process steps:

1. The City Council's approval of the Roadmap2025 development process

2. Scenario workshop

3. Kick-off workshop

4. Segment-focused working groups

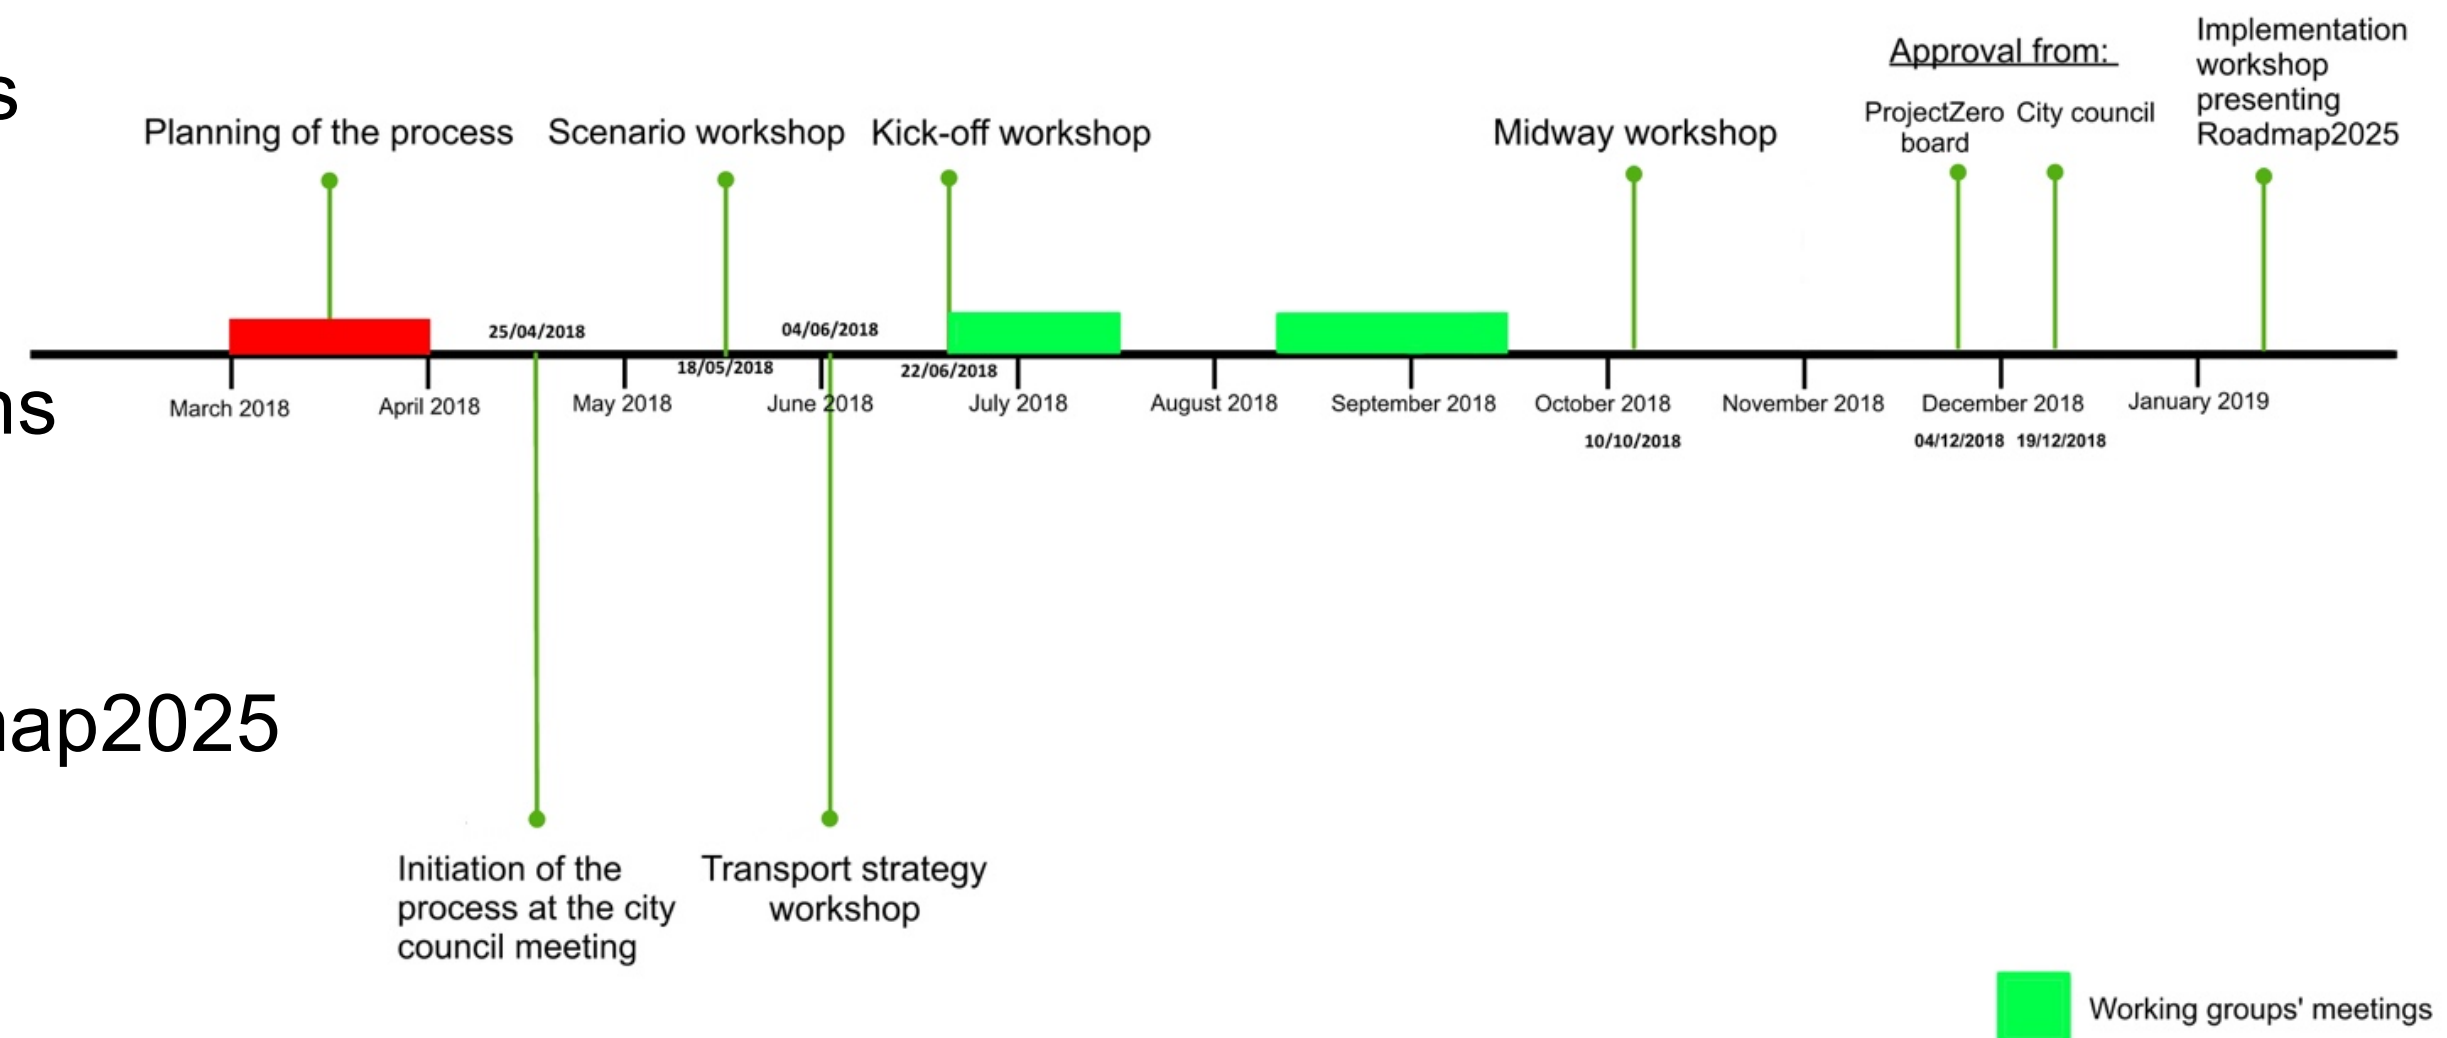

5. Evaluation and calculation

6. Midway workshop and discussions

7. Reporting

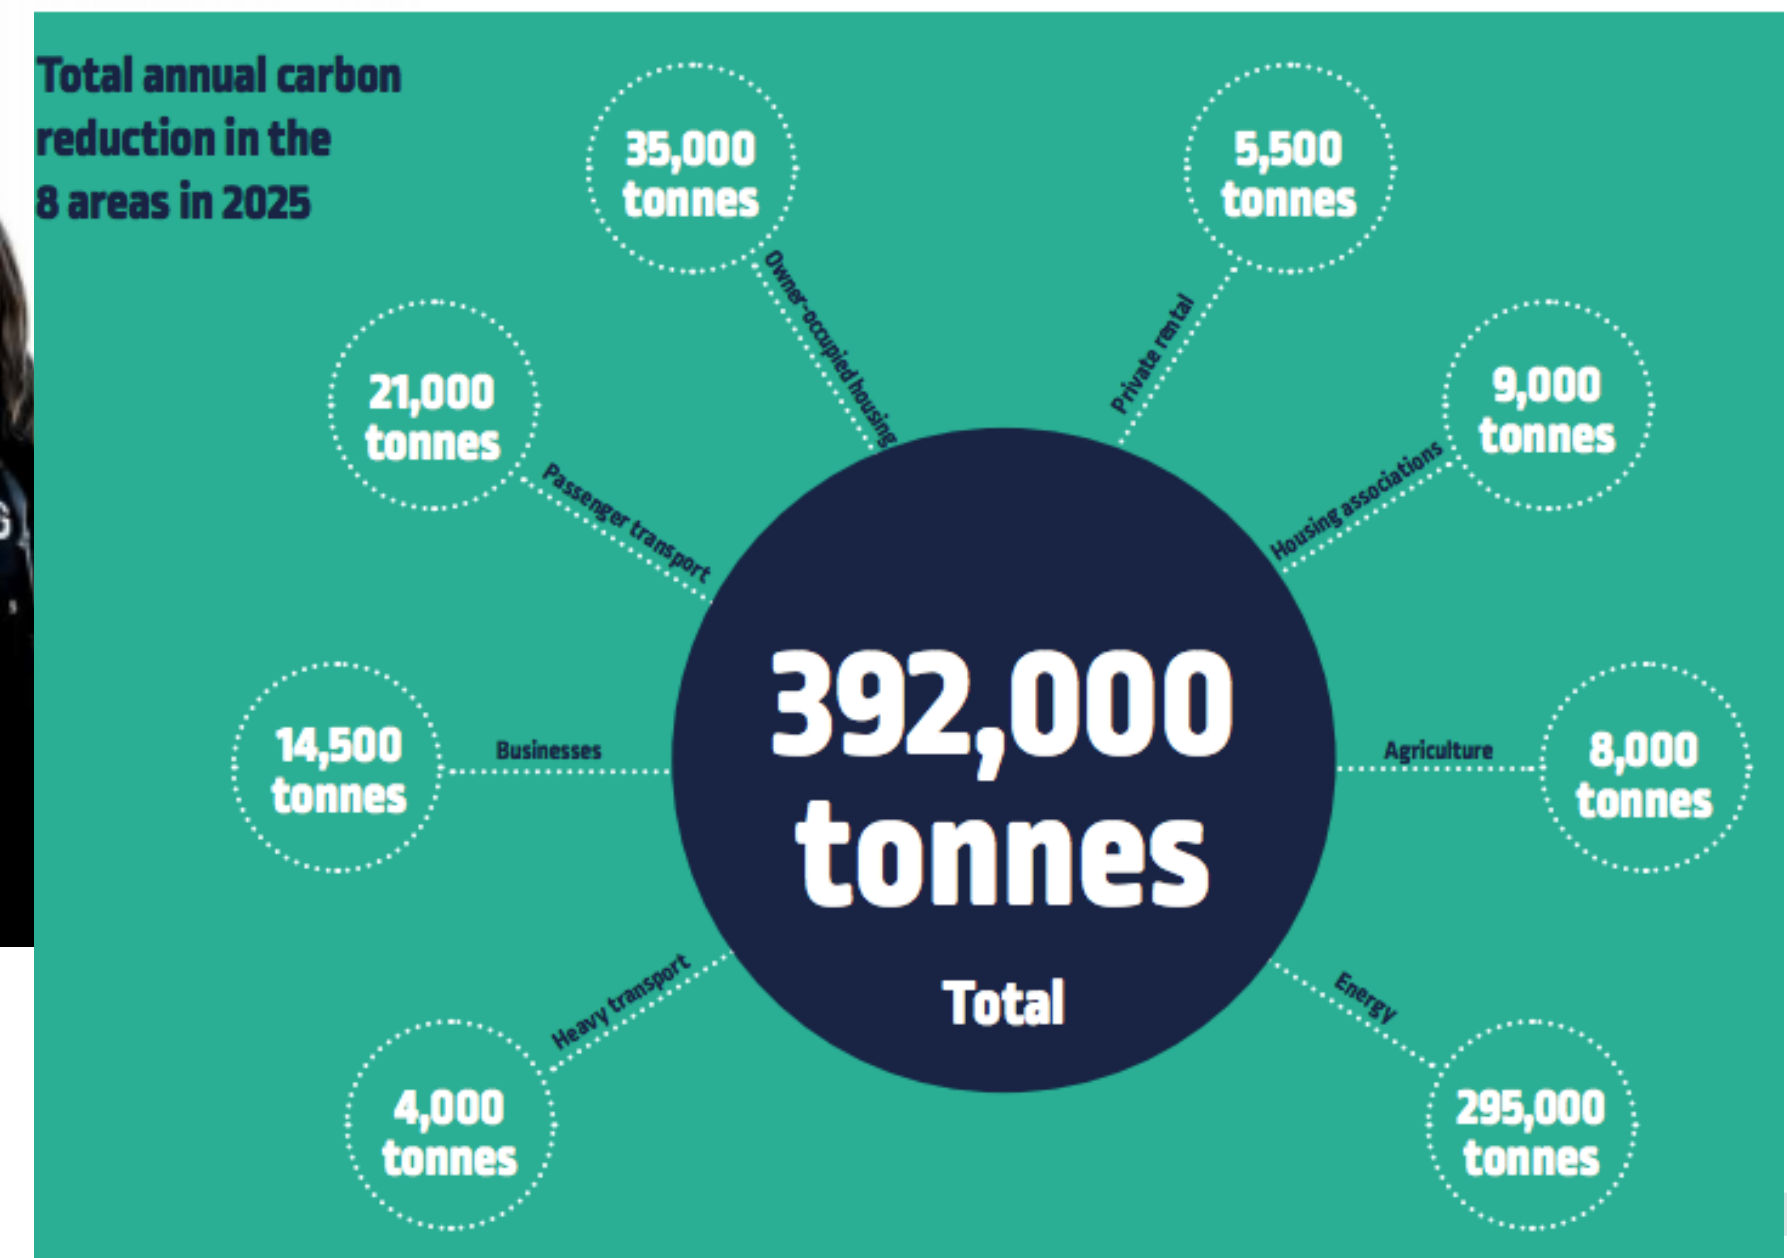

8. City Council's approval of Roadmap2025

### Timeline of the Roadmap2025

## + The 8 segments:

- + Homeowners
- + Housing associations
- + Private rental homes
- + Private transportation
- + Heavy transport
- + Companies
- + Farmers
- + Energy

**You do not have to be a Capital City to do a major difference.**

- ✦ **Join** the SmartEnCity Network and become a Smart Zero Carbon City frontrunner!
- ✦ **Sign up** for the SmartEnCity Network bulletin!
